

Setting Up your My Child At School App Account

1. Download the App on your mobile

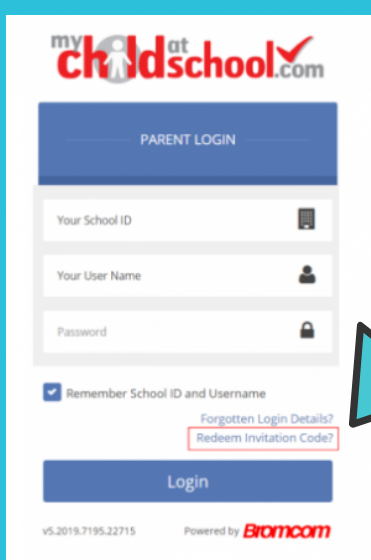

Go to your PlayStore (android) or AppStore (iPhone) and search for MyChildAtSchool

Download the app and when you access it for the first time you will be required to set up a 5-digit PIN and complete the set up by confirming your biometric authentication settings.

Make a note of the PIN you set here - you will need it later!

2. Redeem your invitation code

The first thing you need to do is go to the bottom right of the screen and choose

REDEEM INVITATION CODE

3. Input the information provided by your school

You'll then get a similar screen with slightly different boxes. It's here that you'll put in the three pieces of information the school has sent you.

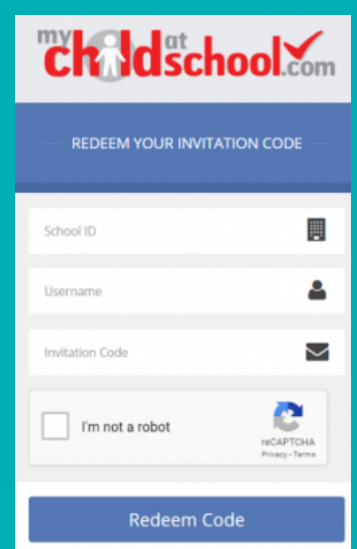

Input the 3 pieces of information provided by your school:

SCHOOL ID

YOUR PERSONAL INVITATION CODE

YOUR USERNAME

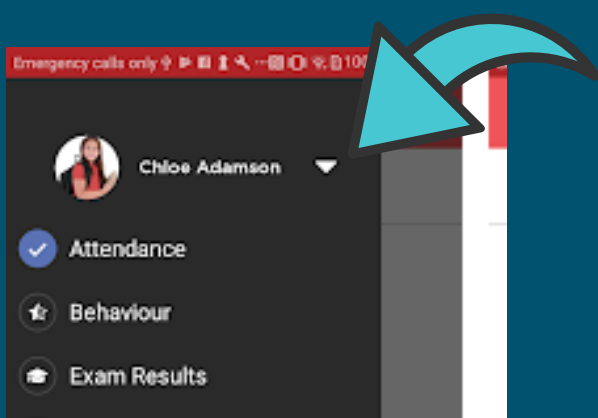

Confirm you are not a robot and then click the Redeem Code button

4. Set up your details

You'll then be asked to set up your details. Enter the required information and click on 'Save Account Details' and you'll get a message telling you your set up has been successful and it will then return you to your login page.

You only need do this once and, by setting up your memorable information it will help you reset your account if you get locked out

So now you're all set and, if you have more than one child in our school, you'll be able to toggle from one child to another.
